# AERONAUTICAL CLIMATOLOGICAL SUMMARIES

**RAEBARELI  
AIRPORT**

**FURSATGANJ**

OFFICE OF CLIMATE RESEARCH & SERVICES  
INDIA METEOROLOGICAL DEPARTMENT

## PREFACE

The aviation industry in India has emerged as one of the fastest growing industries in the country during the last three years. India is currently considered the third largest domestic civil aviation market in the world. Same time meteorological information plays an essential role for all sectors of the Aviation industry - airlines, airports, air traffic control and management for taking correct and timely decisions that makes navigation safe, efficient and cost effective.

Aircrafts fly in the atmosphere where most of the weather systems develop and decay. Information of important meteorological parameters related to the safety of aircraft such as atmospheric Pressure, Temperature, Wind direction and speed, Visibility, Runway Visual Range (RVR) and Cloud Height are needed for smooth operations of an aircraft from take off to the landing phase. It is therefore very essential that climatology of an airport is available as a ready reckoner to understand mean number of occurrences (frequencies) of various weather elements in different temporal scales which affect aircraft operations round the clock. Aeronautical Climatological Summary of an Airport provides this vital information. Aeronautical Climatological Summaries for various National and International Airports are being prepared and updated at regular interval. The publication is prepared on the pattern of WMO Models A, B, C, D, E and Table VI in accordance with the procedures laid down in Technical Regulations as per International Civil Aviation Organization (ICAO) standards. The details of these models are given in Appendix-1. The present publication has been prepared for **Raebareli Airport, Fursatganj** (Latitude 26.25° N, Longitude 81.37° E and Altitude 109 m) using the meteorological data for the period 2011-2015.

The entire work of this publication has been done by a group of officers and staff members led by Shri Nahush Kulkarni, Scientist- B, CDMS group, Surface Statistics & Planning Section, O/o Climate Research & Services (CRS), IMD, Pune under the guidance of Shri. A.D. Tathe , Scientist E, Group Head Climate Data Management System(CDMS) . The valuable contributions were made by Smt. S.H. Joshi and Shri N. D. Sabale and Mrs. Reshma Pathan towards the preparation of theses summaries.

I am hopeful that this updated publication will serve as a source of useful information to aviation services.

Dr. D.S. Pai  
Head CRS

## CONTENTS

<b>Sn</b>	<b>Model name</b>	<b>Description</b>	<b>Pages</b>
<b>1</b>	MODEL - A	Runway Visual Range or Visibility and/or the height of the base of lowest cloud layer	1 - 12
<b>2</b>	MODEL - B	Visibility	13 - 24
<b>3</b>	MODEL - C	Height of base of the lowest cloud	25 - 36
<b>4</b>	MODEL - D	Wind direction and wind speed	37 - 132
<b>12</b>	MODEL - E	Temperature	133 - 144
<b>13</b>	TABLE - VI	Atmospheric pressure	145 - 156

## DESCRIPTION OF MODELS

<b>Model type</b>	<b>Description</b>
<b>MODEL A</b>	Monthly mean number of occurrences of Runway Visual Range or Visibility and/or the height of the base of lowest cloud layer (metres) covering more than 4/8th of the sky (HS), below specified values and time.
<b>MODEL B</b>	Monthly mean number of occurrences of visibility below specified values (metres ) and time.
<b>MODEL C</b>	Monthly mean number of occurrences of the height of the base (metres) of the lowest cloud layer (metres) covering more than 4/8th of the sky below specified values and time.
<b>MODEL D</b>	Monthly mean number of occurrences of concurrent wind direction (30 degree sector) and wind speed (knots) within specified ranges.
<b>MODEL E</b>	Monthly mean number of occurrence of screen temperature (in ranges of 5 degrees) at specified time.
<b>TABLE VI</b>	Monthly mean daily atmospheric pressure (hPa) at the reference level / mean sea level ( for low level stations ) at standard times of synoptic observation (UTC).

**THE TERMS USED IN PUBLICATION WITH DESCRIPTION AND ITS UNITS.**

S.N.	Terms	Description and Units
1	Time	Time of observation in universal time constant (UTC).
2	HS	The height of base of lowest cloud layer covering more than 4/8 of the sky (metres).
3	Visibility	Horizontal visibility (metres).
4	RVR	Runway Visual Range (metres).
5	Wind Direction	Direction of wind from true north (degrees).
6	Wind speed	The speed of wind(knots).
7	Pressure	Mean sea level pressure (hPa).
8	Temperature	Screen temperatures (degree Celsius).
